Antisocial Behavior And Crime Contributions Of Developmental And Evaluation Research To Prevention And Intervention Pdf

This is likewise one of the factors by obtaining the soft documents of this Antisocial Behavior And Crime Contributions Of Developmental And Evaluation Research To Prevention And Intervention Pdf by online. You might not require more era to spend to go to the books foundation as well as search for them. In some cases, you likewise do not discover the pronouncement Antisocial Behavior And Crime Contributions Of Developmental And Evaluation Research To Prevention And Intervention Pdf that you are looking for. It will unconditionally squander the time.

However below, once you visit this web page, it will be suitably very simple to acquire as skillfully as download lead Antisocial Behavior And Crime Contributions Of Developmental And Evaluation Research To Prevention And Intervention Pdf It will not understand many period as we accustom before. You can realize it even if produce an effect something else at home and even in your workplace. in view of that easy! So, are you question? Just exercise just what we present under as well as evaluation Antisocial Behavior And Crime Contributions Of Developmental And Evaluation Research To Prevention And Intervention Pdf what you taking into consideration to read!

Macrocriminology and Freedom - John Braithwaite 2022-02-15
How can power over others be transformed to ‘power with’? It is possible to transform many institutions to build societies with less predation and more freedom. These stretch from families and institutions of gender to the United Nations. Some societies, times and places have crime rates a hundred times higher than others. Some police forces kill at a hundred times the rate of others. Some criminal corporations kill thousands more than others. Micro variables fail to explain these patterns. Prevention principles for that challenge are macrocriminological. Freedom is conceived in a republican way as non-domination. Tempering domination prevents crime; crime prevention reduces domination. Many believe a high crime rate is a price of freedom. Not Braithwaite. His principles of crime control are to build freedom, temper power, lift people from poverty and reduce all forms of domination. Freedom requires a more just normative order. It requires cascading of peace by social movements for non-violence and non-domination. Periods of war, domination and anomie cascade with long lags to elevated crime, violence, inter-generational self-violence and ecocide. Cybercrime today poses risks of anomic nuclear wars. Braithwaite’s proposals refine some of criminology’s central theories and sharpen their relevance to all varieties of freedom. They can be reduced to one sentence. Strengthen freedom to prevent crime, prevent crime to strengthen freedom. ‘A true magnum opus, Macrocriminology and Freedom is a thought provoking and generative book from one of criminology’s intellectual giants. John Braithwaite reaches far and wide across societies, time, and disciplines to advance no less than a theory of how to build a society that simultaneously reduces both domination and crime. His ambitious ideas on cascades of non-dominating collective efficacy and crime prevention, for example, and their connections to social movements and political freedom, go well beyond usual criminological discourse. Chock full of theoretical propositions and bold insights, this a book that will keep criminologists busy for years. Macrocriminology and Freedom should not just be read, but better yet, savoured.’ – Robert J. Sampson, Henry Ford II Professor of the Social Sciences, Harvard University ‘In this majestic theorisation of the relationship between crime and freedom John Braithwaite isolates the unique power of macrocriminology as a lens through which to comprehend and challenge many of the fundamental crises facing our planet. Very few scholars have the breadth and overview to succeed in a mission of this order ... Braithwaite does. This extraordinary book is an object lesson for all who seek to understand and resist domination and the crimes of power that flow from it.’ – Penny Green, Professor of Law and Globalisation, Queen Mary University of London ‘For over 40 years, John Braithwaite has been a voice of wisdom, hope and humanity in criminology. This dazzling new book weaves together all the main themes of his influential work, reanimating many of the core concepts of the discipline, as well as incorporating interdisciplinary resources
FROM SOUTH AND NORTH, EAST AND WEST, TO PRODUCE AN ELEGANT AND AMBITIOUS EXPLANATORY AND NORMATIVE ACCOUNT OF CRIME AS FREEDOM-THREATENING DOMINATION. DECENTRING CRIMINAL JUSTICE AS THE SOLUTION TO CRIME, BRAITHWAITE SHOWS THAT, ON A GLOBAL SCALE, THE ASPIRATION TO TACKLE CRIMES, RANGING FROM INTERPERSONAL VIOLENCE THROUGH CORPORATE CRIMES TO ECOCIDE, LIES IN THE DEVELOPMENT OF FREEDOM-ENHANCING, POWER-TEMPERING INSTITUTIONS IN THE POLITICAL, ECONOMIC AND SOCIAL SPHERES.  

- NICOLA LACEY, PROFESSOR OF LAW, GENDER AND SOCIAL POLICY, LONDON SCHOOL OF ECONOMICS

"Macrocriminology and Freedom is a criminological epic, an expansive and erudite story that sweeps across history and contexts. The book is frightening in showing how cascading events can produce catastrophes from crime to environmental destruction. But in the end, its message is hopeful, identifying pathways—or "normative rivers"—for guiding freedom from domination and crime. Drawing on his distinguished career, John Braithwaite has bestowed an extraordinary gift—a book, like other masterpieces, that will yield special insights each time we take an excursion through its pages."

- FRANCIS T. CULLEN, DISTINGUISHED RESEARCH PROFESSOR EMERITUS, UNIVERSITY OF OXFORD AND MONASH UNIVERSITY

"John Braithwaite has reinvented discussions about crime and its control. While advocating a macro approach, the book is punctuated not only with insights and data from smaller-scale studies conducted in a range of jurisdictions, but also with auto-biographical vignettes. The effect creates a deeply personal account of the perils of state, non-state and market violence and authoritarianism and the potential and indeed duty, of criminologists to work towards their reduction, by refocusing their efforts on explaining and tackling crime in its myriad of forms."

- MARY BOSWORTH, PROFESSOR OF CRIMINOLOGY, UNIVERSITY OF OXFORD AND MONASH UNIVERSITY

"John Braithwaite has had a unique influence on criminology globally. In this encyclopaedic text he synthesises a wealth of criminological knowledge, particularly in the sphere of anomie theory, into broader debates about the nature of domination and freedom in contemporary society. He defends the relevance of criminological theory, while urging criminology to be activist rather than reactive and technocratic, counter-hegemonic rather than neutral. Not for the first time, John Braithwaite has challenged criminologists to construct theories that cut across micro and macro structures. This book will stir debate. It deserves a broad readership."

- HARRY BLAGG, PROFESSOR OF CRIMINOLOGY, UNIVERSITY OF WESTERN AUSTRALIA

Offending from Childhood to Late Middle Age - DAVID P. FARRINGTON 2023-06-30

This second edition book advances knowledge about criminal careers throughout life. It presents new results from the Cambridge Study in Delinquent Development (CSDD), which is a unique longitudinal study of the development of offending from age 10 to age 61. Previous results obtained in the CSDD are reviewed, and then new findings from official criminal records up to age 61 are presented: on offending at different ages, continuity in offending, ages of onset, and criminal career duration. The number of offenders and offenses between ages 50 and 61 is noteworthy. The book then presents results on self-reported offending in different age ranges up to 48: on prevalence, frequency, continuity, and comparisons with official records that suggest that official records only capture the tip of the iceberg of offending. It then analyzes different trajectories of official offending up to age 61 and shows to what extent they could be predicted by childhood risk factors. New results from the CSDD in the last 10 years are then presented, followed by a discussion of the relevance of all the findings for criminological theories and public policies such as early intervention. This book should be of great interest not only to academics but also to policy makers and practitioners who are concerned with crime.

Gambling Disorders in Women - Henrietta Bowden-Jones 2017-07-14

This book brings together an international selection of academics with expertise in problem gambling issues in women, with chapters reflecting ongoing work with female gamblers across the world in both group and individual settings. In choosing such a specific patient group, the authors aim to raise the profile of gambling disorders in women and also provide fellow professionals across the world with a shared understanding of evidence based treatment and recovery in problem gambling literature and research. Gambling Disorders in Women: An International Female Perspective on Treatment and Research will provide professionals working in addictions and policy-making with much-needed knowledge about a seriously under-represented area, and about which many professionals feel they would like to know more. The book will also highlight different international approaches to the provision of treatment for women in each country as well as the epidemiology of the illness.

Crime and Justice, Volume 42 - Michael Tonry 2013-10-06

For the American criminal justice system, 1975 was a watershed year. Offender rehabilitation and individualized sentencing fell from favor. The partisan politics of “law and order” took over. Among the results four decades later are the world’s harshest punishments and highest imprisonment rate. Policymakers’ interest in what science could tell them plummeted just when scientific work on crime, recidivism, and the justice system began to blossom. Some policy areas—sentencing, gun violence, drugs, youth violence—became evidence-free zones. In others—developmental crime prevention, policing, recidivism studies, evidence mattered. Crime and Justice in America: 1975-2025 tells how policy and knowledge did and did not interact over time and charts prospects for the
future. What accounts for the timing of particular issues and research advances? What did science learn or reveal about crime and justice, and how did that knowledge influence policy? Where are we now, and, perhaps even more important, where are we going? The contributors to this volume, the leading scholars in their fields, bring unsurpassed breadth and depth of knowledge to bear in answering these questions. They include Philip J. Cook, Francis T. Cullen, Jeffrey Fagan, David Farrington, Daniel S. Nagin, Peter Reuter, Lawrence W. Sherman, and Franklin E. Zimring. For thirty-five years, the Crime and Justice series has provided a platform for the work of sociologists, psychologists, criminal lawyers, justice scholars, and political scientists as it explores the full range of issues concerning crime, its causes, and its remedies.

Facilitating Desistance from Aggression and Crime - Calvin M. Langton 2022-07-12
In Facilitating Desistance from Aggression and Crime: Theory, Research, & Strength-Based Practices, Drs. Calvin Langton and James Worling have gathered together internationally renowned authorities in the fields of psychology, psychiatry, criminology, social work, and law, to critically examine desistance as a construct, process, and outcome as well as the place of strengths work in correctional and forensic mental health settings. Integrating theory, empirical evidence, and applied practices, this timely volume is an essential scholarly resource with a clear practical emphasis for policy makers, researchers, practitioners, and graduate students.

This book describes the lives of 12 people born in Europe and North America during the Second World War. They became leading scholars on the development and prevention of violent human behavior. From the first to the last page, the book introduces contrasting life-stories and shows how their paths crossed to create a relatively unified body of knowledge on how human violence develops and possible prevention methods. The authors describe the similarities and differences in their family background, university training, theories, and collaborations. Not to mention how they differ in research methods, scientific conclusions, and their influence on the research published today. These comparisons celebrates the diversity of their experience and, in turn, their achievements. By knowing this, you can stand on the shoulders of these giants to look to the future of this subject and potentially contribute to its next steps.

This information-rich volume expands current knowledge about sexually violent predators and critiques SVP laws with the goal of fostering improvements in clinical practice and public policy. It offers a finely detailed evidence base on this problematic class of offenders, including the complex interactions of biophysical and environmental factors that contribute to criminal sexual behavior. Chapters discuss a wide range of assessment issues and instruments central to SVP evaluation, and the possibilities for developing interventions that address individual motivations and behaviors to reduce the risk of reoffending. And throughout, careful attention is paid to ongoing legal, ethical, and logical concerns regarding sexually violent offenders, their treatment and confinement, and their post-confinement placement. Among the topics covered: ‘Civil commitment of sex offenders.’ ‘The physiological basis of problematic sexual interests and behaviors.’ ‘Sexually violent predator evaluations: problems and proposals.’ ‘Cultural considerations in the assessment of sexually violent predators.’ ‘Management of sex offenders in community settings.’ ‘Effective use of an expert in sexually violent predator commitment hearings.’ Offering numerous issues for discussion and debate with considerable implications for clinical practice, policy, and the judicial system, Sexually Violent Predators will interest and enlighten forensic psychologists and psychiatrists as well as social workers, policy-makers, and legal professionals.

The Development of Criminal and Antisocial Behavior - Julien Morizot 2014-12-02
This edited book summarizes the current state of knowledge on the development of criminal and antisocial behavior over the life course. It focuses mainly on the developmental perspective, which has had a paradigmatic influence on current theoretical and empirical works in criminology. With a multidisciplinary perspective, the book reviews: (a) the fundamental concepts of developmental criminology; (b) the risk factors and developmental processes related to the most salient personal (e.g., genetics, personality) and environmental (e.g., family, peers, school) domains explaining the development of criminal and antisocial behavior; (c) the developmental issues related to a number of special themes (e.g., women criminality, street gangs) and (d) the applied and policy implications of research in developmental criminology. In each chapter, prominent researchers from different disciplines such as criminology and psychology summarize the state of knowledge on a specific topic, identify the shortcomings of past research, offer recommendations for future research needs.

Infants and Children - Laura E. Berk 2022-06-25
Now published by SAGE! A best-selling, chronologically organized child development text, Laura E. Berk’s Infants and Children: Prenatal Through Middle Childhood, Ninth Edition is relied on in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, first-rate coverage of
Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and “get tough” pronouncements. In the midst of this emotional debate, the National Research Council’s Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. Juvenile Crime, Juvenile Justice presents recommendations for addressing the many aspects of America’s youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? Juvenile Crime, Juvenile Justice presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult criminal justice system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

Women and Children as Victims and Offenders: Background, Prevention, Reintegration - Helmut Kury 2016-06-01

This work compiles experiences and lessons learned in meeting the unique needs of women and children regarding crime prevention and criminal justice, in particular the treatment and social reintegration of offenders, and serves as a cross-disciplinary work for academic and policy-making analyses and follow-up in developing and developed countries. Furthermore, it argues for a more humane and effective approach to countering delinquency and crime among future generations. In a world where development positively depends on the rule of law and the related investment security, two global trends may chart the course of development: urbanization and education. Urbanization will globalize the concepts of “justice” and “fairness”; education will be dominated by the urban mindset and digital service economy, just as a culture of lawfulness will. This work looks at crime prevention education as an investment in the sustainable quality of life of succeeding generations, and at those who pursue such crime prevention as the providers of much-needed skills in the educational portfolio. Adopting a reformist approach, this work collects articles with findings and recommendations that may be relevant to domestic and international policymaking, including the United Nations Studies and their educational value for the welfare of coming generations. The books address the relevant United Nations ideas by combining them with academic approaches. Guided by the Editors’ respective fields of expertise, and in full recognition of academic freedom and “organized scepticism”, it includes contributions by lawyers, criminologists, sociologists and other eminent experts seeking to bridge the gap between academic and policy perspectives, as appropriate, against the international background, including the United Nations developments. The first volume opens with a foreword by Marta Santos Pais, the United Nations Special Representative of the Secretary-General on Violence against Children, and a general introduction by the editors. Part I provides an overview of United Nations principles for crime prevention and the treatment of women and children. Part II concentrates on education and the social learning of children and adolescents. The importance of quality education is stressed as is its impact on the behaviour of children of all
ages. It also includes a discussion of the factors that still hinder access to good schooling in many parts of the world. Part III presents international research findings on children, juveniles and women both as victims and offenders. Statistics show overwhelmingly that these groups are more often victims than offenders.

**Development Through The Lifespan** - Laura E. Berk 2022-06-24

Now published by SAGE! With its seamless integration of up-to-date research, strong multicultural and cross-cultural focus, and clear, engaging narrative, Development Through The Lifespan, by best-selling author Laura E. Berk, has established itself as the market’s leading text. Known for staying current, the fully updated Seventh Edition offers the latest, most relevant research and applications in the field of human development. New and compelling topics, rich examples, coupled with Berk’s signature storytelling style, makes this edition the most accessible and engaging text available to students today. Included with this title: LMS Cartridge: Import this title’s instructor resources into your school’s learning management system (LMS) and save time. Don’t use an LMS? You can still access all of the same online resources for this title via the password-protected Instructor Resource Site. Learn more.

**The Routledge International Handbook of Life-Course Criminology** - Arjan Blokland 2017-03-16

Since its introduction in the latter half of the 1980s, the meticulous study of distinct criminal career dimensions, like onset, frequency, and crime mix, has yielded a wealth of information on the way crime develops over the life-span. Policymakers in turn have used this information in their efforts to tailor criminal justice interventions to be both effective and efficient. Life-course criminology studies the ways in which the criminal career is embedded in the totality of the individual life-course and seeks to clarify the causal mechanisms governing this process. The Routledge International Handbook of Life-Course Criminology provides an authoritative collection of international theoretical and empirical research into the way that criminal behavior develops over the life-span, which causal mechanisms are involved in shaping this development, and to what degree criminal justice interventions are successful in redirecting offenders’ criminal trajectories. Drawing upon qualitative and quantitative research this handbook covers theory, describes and compares criminal career patterns across different countries, tests current explanations of criminal development, and using cutting-edge methods, assesses the intended and unintended effects of formal interventions. This book is the first of its kind to offer a comprehensive overview of state-of-the-art developments in criminal career and life-course research, providing unique perspectives and exclusive local knowledge from over 50 international scholars. This book is an ideal companion for teachers and researchers engaged in the field of developmental and life-course criminology.

**Evidence-based Parenting Education** - James J. Ponzetti, Jr. 2015-08-14

This is the first book to provide a multidisciplinary, critical, and global overview of evidence-based parenting education (PEd) programs. Readers are introduced to the best practices for designing, implementing, and evaluating effective PEd programs in order to teach clients how to be effective parents. Noted contributors from various disciplines examine evidence-based programs from the U.S., Canada, Europe, Asia, Australia, as well as web-based alternatives. The best practices used in a number of venues are explored, often by the developers themselves. Examples and discussion questions encourage application of the material. Critical guidance for those who wish to design, implement, and evaluate PEd programs in various settings is provided. All chapters feature learning goals, an introduction, conclusion, key points, discussion questions, and additional resources. In addition to these elements, chapters in Part III follow a consistent structure so readers can easily compare programs—theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural implications, evidence-based research and evaluation, and professional preparation and training issues. The editor has taught parenting and family life education courses for years. This book reviews the key information that his students needed to become competent professionals. Highlights of the book’s coverage include:

- Comprehensive summary of evidence-based PEd training programs in one volume. Prepares readers for professional practice as a Certified Family Life Educator (CFLE) by highlighting the fundamentals of developing and evaluating PEd programs. Exposes readers to models of parenting education from around the world. The book opens with a historical overview of PEd development. It is followed by 20 chapters divided in four parts. The initial six chapters focus on fundamentals of parenting education --program design, implementation, evaluation, the role of mediators and moderators, as well as the U.S. Cooperative Extension Parent Framework. The three chapters in Part II review the latest status of parenting education in Europe, Asia, and web-based alternatives. Part III presents ten stellar, evidence-based parenting programs offered around the world. In addition to the learning goals, introduction, conclusion, key points, discussion questions, and additional resources that are found in all chapters, those in Part III also consider theoretical foundations and history, needs assessment and target audience, program goals & objectives, curriculum issues, cultural implications, evidence-based research and evaluation, and professional preparation and training issues. Part IV reviews future directions. Ideal for advanced
The youth of the world are our most important assets. When youth develop positively, they have the power to...
benefit themselves, their families, communities, and societies. These tremendous benefits accrue for many generations, so investments in youth represent a highly cost-effective opportunity for positive change. This is the first volume to focus globally on the effects of social and economic change on youth, and on the opportunity to support youth through policy, programs, and interventions to develop positively despite challenges. The chapters in this volume highlight research demonstrating youth assets and resilience as well as programs and interventions that increase the likelihood that youth will thrive. Many chapters also draw attention to opportunities for youth leadership, helping youth to develop their strengths as they benefit their communities. Additional chapters focus on promoting optimal youth development in the presence of adversity, risk, or challenge, taking into consideration the potential and capacity of the young person. Finally, the ecological system theory is a strong influence in many chapters that examine the inter-relationship of different social contexts such as family, peers, school, and work. Positive Youth Development in Global Contexts of Social and Economic Change is both a vision for the future and an ideology supported by a new international vocabulary for engaging with youth development. Developed by researchers across interdisciplinary fields, the volume has enormous policy implications for lawmakers given the surge in youth population in many parts of the world.

Risk Assessment for Juvenile Violent Offending - Anna Costanza Baldry 2012-12-12
This volume is the result of an EU project involving two different European countries (Italy and Cyprus) on risk and needs assessment for juvenile violent offenders. The book is based on a longitudinal data base of juveniles who have committed violent crimes and who have been followed up after six months to measure their recidivism rate. The aim of this book is to provide practitioners who are dealing with juvenile (violent) offenders, with scientifically-based theories and knowledge derived from results about risk assessment. In particular it shows how a newly developed and tested instrument/approach, the EARN (European Assessment of Risk and Needs) works and how it can be used to help practitioners. Recidivism of violence in juveniles is based on several risk factors and is reduced on the basis of protective factors. Efficient legal intervention and treatment are more and more tailored according to the risk factors but also to the needs of juveniles. Juvenile Justice Systems in Europe tend to approach the juvenile who has committed a crime not only from a sanction point of view but more as an opportunity for the juvenile, his or her family and the social context in general, to reduce the risk of recidivism. This book will be of interest to researchers, students, social workers, police officers and lawyers.

The Cambridge Handbook of Violent Behavior and Aggression presents the current state of knowledge related to the study of violent behaviors and aggression. An important extension of the first Handbook published ten years ago, the second edition maintains a distinctly cross-disciplinary focus by representing the newest scholarship and insights from behavior genetics, cross-cultural comparative psychology/criminology, evolutionary psychology, criminal justice, criminology, human development, molecular genetics, neurosciences, psychology, prevention and intervention sciences, psychiatry, psychopharmacology, public health, and sociology. The Handbook is divided into introductory and overview chapters on the study of violent behavior and aggression, followed by chapters on biosocial bases, individual and interpersonal factors, contextual factors, and prevention and intervention work and policy implications. It is an essential resource for researchers, scholars, and graduate students across social and behavioral science disciplines interested in the etiology, intervention, and prevention of violent behavior and aggression.

The Handbook of Evolutionary Psychology, Volume 2 - David M. Buss 2015-09-29
A complete exploration of the real-world applications and implications of evolutionary psychology The exciting and sometimes controversial science of evolutionary psychology is becoming increasingly relevant to more fields of study than ever before. The Handbook of Evolutionary Psychology, Volume 2, Integrations provides students and researchers with new insight into how EP draws from, and is applied in, fields as diverse as economics, anthropology, neuroscience, genetics, and political science, among others. In this thorough revision and expansion of the groundbreaking handbook, luminaries in the field provide an in-depth exploration of the foundations of evolutionary psychology as they relate to public policy, consumer behavior, organizational leadership, and legal issues. Evolutionary psychology seeks to explain the reasons behind friendship, leadership, warfare, morality, religion, and culture — in short, what it means to be human. This enlightening text provides a foundational knowledgebase in EP, along with expert insights and the most up-to-date coverage of recent theories and findings. Explore the vast and expanding applications of evolutionary psychology Discover the psychology of human survival, mating parenting, cooperation and conflict, culture, and more Identify how evolutionary psychology is interwoven with other academic subjects and traditional psychological disciplines Discuss future applications of the conceptual tools of evolutionary psychology As the established standard in the field, The Handbook of Evolutionary Psychology, Volume 2 is the definitive guide for every psychologist and student to understand the
LATEST AND MOST EXCITING APPLICATIONS OF EVOLUTIONARY PSYCHOLOGY.

VIOLENT AND SEXUAL OFFENDERS - Jane L. Ireland 2018-08-29

Building on the success of the first edition and the growth of research in the field over the past decade, this book offers an authoritative overview of the assessment, treatment, and management of violent and sexual offenders. This new and expanded edition reflects the considerable developments in research and empirical data and captures the increasing breadth of risk assessment approaches, the wider range of empirically based therapies, and the more creative means of considering management. The second edition captures key developments in this area, with new chapters drawing on a range of pressing contemporary issues, such as female offenders, Internet offenders, terrorists, young people involved in harmful sexual behaviour, and protective factors for aggression. There is also extended coverage of the management of offenders within secure settings and in the community, referring to a wider variety of approaches and the incorporation of technology. This book will be of considerable interest to academics, practitioners, and students engaged with understanding and/or treating violence and aggression, sex crime, forensic psychology, and the assessment, treatment, and management of offenders.

Handbook of Research on Trends and Issues in Crime Prevention, Rehabilitation, and Victim Support - Balloni, Augusto 2019-12-27

A complex and vulnerable contemporary society continually poses new challenges in terms of social conflict, and as crime advances, so must strategies for prevention and rehabilitation. Many facets of crime prevention and rehabilitation of offenders are public activities closely linked to other aspects of the political and social life of a region. The Handbook of Research on Trends and Issues in Crime Prevention, Rehabilitation, and Victim Support is a scholarly publication that examines existing knowledge on crime dynamics and the implementation of crime victims' rights. Highlighting a wide array of topics such as cyberbullying, predatory crimes, and psychological violence, this book is ideal for criminologists, forensic psychologists, psychiatrists, victim advocates, law enforcement, criminal profilers, crime analysts, therapists, rehabilitation specialists, psychologists, correctional facilities, wardens, government officials, policymakers, academicians, researchers, and students.

The Developmental Science of Adolescence - Richard M. Lerner 2013-08-15

The Developmental Science of Adolescence: History Through Autobiography is the most authoritative account of the leading developmental scientists from around the world. Written by the scholars who shaped the history they are recounting, each chapter is an engaging and personal account of the past, present, and future direction of the field. No other reference work has this degree of authenticity in presenting the best developmental science of adolescence. The book includes a Foreword by Saths Cooper, President of the International Union of Psychological Science and autobiographical chapters by the following leading developmental scientists: Jeffrey Jensen Arnett, Robert Wm. Blum, Jeanne Brooks-Gunn, B. Bradford Brown, Marlis Buchmann, John Byrner, John Coleman, Rand D. Conger, James E. Côté, William Damon, Sanford M. Dornbusch, Nancy Eisenberg, Glen H. Elder, Jr., David P. Farrington, Helmut Fend, Andrew J. Fuligni, Frank F. Furstenberg, Beatrix A. Hamburg, Stephen F. Hamilton, Karen Hein, Klaus Hurrelmann, Richard Jessor, Daniel P. Keating, Reed W. Larson, Richard M. Lerner, Iris F. Litt, David Magnusson, Rolf Oerter, Daniel Offer, Augusto Palmonari, Anne C. Petersen, Lea Pulkkinen, Jean E. Rhodes, Linda M. Richter, Hans-Dieter Rössler, Michael Rutter, Ritch C. Savin-Williams, John Schulenberg, Lonnie R. Sherrod, Rainer K. Silbereisen, Judith G. Smetsana, Margaret Beale Spencer, Laurence Steinberg, Elizabeth J. Susman, Richard E. Tremblay, Suman Verma, and Bruna Zani.

Clinical Interviewing, with Video Resource Center - John Sommers-Flanagan 2015-06-29

Clinical Interviewing, Fifth Edition blends a personal and easy-to-read style with a unique emphasis on both the scientific basis and interpersonal aspects of mental health interviewing. It guides clinicians through elementary listening and counseling skills onward to more advanced, complex clinical assessment processes, such as intake interviewing, mental status examination, and suicide assessment. Fully revised, the fifth edition shines a brighter spotlight on the development of a multicultural orientation, the three principles of multicultural competency, collaborative goal-setting, the nature and process of working in crisis situations, and other key topics that will prepare you to enter your field with confidence, competence, and sensitivity.

The Handbook of Juvenile Delinquency and Juvenile Justice - Marvin D. Krohn 2015-06-22

This handbook is an up-to-date examination of advances in the fields of juvenile delinquency and juvenile justice that includes interdisciplinary perspectives from leading scholars and practitioners. Examines advances in the fields of juvenile delinquency and juvenile justice with interdisciplinary perspectives from leading scholars and practitioners Provides a current state of both fields, while also assessing where they have been and defining where they should go in years to come Addresses developments in theory, research, and policy, as well as cultural changes and legal shifts Contains summaries of juvenile justice trends from around the world, including the US, the Netherlands, Brazil, Russia, India, South Africa, and China Covers central issues in the scholarly literature, such
AS SOCIAL LEARNING THEORIES, OPPORTUNITY THEORIES, CRIMINAL PROCESSING, LABELING AND DETERRENCE, GANGS AND CRIME, COMMUNITY-BASED SANCTIONS AND REENTRY, VICTIMIZATION, AND FEAR OF CRIME

Environmental Corrections - Lacey Schaefer 2015-10-09
A new paradigm for supervising offenders in the community. Environmental Corrections is an innovative guide filled with rich insights and strategies for probation and parole officers to effectively integrate offenders back into the community and reduce recidivism. Authors Lacey Schaefer, Francis T. Cullen, and John E. Eck move beyond traditional models for interventions and build directly on the applied focus of environmental criminology theories. Using this approach, the authors answer the question of what officers can do to decrease opportunities for an offender to commit a crime. Readers will learn how to recognize and assess specific criminal opportunities in an offender’s past and gain the tools and strategies they need to design an individualized supervision plan that channels offenders away from these criminogenic situations.

A comprehensive guide to the theory, research and practice of violence risk management. The Wiley Handbook of What Works in Violence Risk Management: Theory, Research and Practice offers a comprehensive guide to the theory, research and practice of violence risk management. With contributions from a panel of noted international experts, the book explores the most recent advances to the theoretical understanding, assessment and management of violent behavior. Designed to be an accessible resource, the highly readable chapters address common issues associated with violent behavior such as alcohol misuse and the less common issues for example offenders with intellectual disabilities. Written for both those new to the field and professionals with years of experience, the book offers a wide-ranging review of what commit acts of violence, their prevalence in society and the most recent explanations for their behavior. The contributors explore various assessment approaches and highlight specialized risk assessment instruments. The Handbook provides the latest evidence on effective treatment and risk management and includes a number of well-established and effective treatment interventions for violent offenders. This important book: Contains an authoritative and comprehensive guide to the topic Includes contributions from an international panel of experts Offers information on violence risk formulation Reveals the most recent techniques in violence risk assessment Explains what works in violence intervention Reviews specialty clinical assessments Written for clinicians and other professionals in the field of violence prevention and assessment, The Wiley Handbook of What Works in Violence Risk Management is unique in its approach because it offers a comprehensive review of the topic rather than like other books on the market that take a narrower view.

Child Psychology - Lawrence Balter 2016-02-26
This third edition of Child Psychology continues the tradition of showcasing cutting-edge research in the field of developmental science, including individual differences, dynamic systems and processes, and contexts of development. While retaining a similar structure to the last edition, this revision consists of completely new content with updated programmatic research and contemporary research trends and interests. The first three sections highlight research that is organized chronologically by age: Infancy, Childhood, and Adolescence. Within each section, individual chapters address contemporary research on a specific area of development, such as learning, cognition, social, and emotional development at that period in childhood. The fourth section, Ecological Influences, emphasizes contextual influences relevant to children of all ages, including risk and protective processes, family and neighborhood context, race and ethnicity, peer relations, the effects of poverty, and the impact of the digital world. Child Psychology also features a unique focus on four progressive themes. First, emphasis is placed on theory and explanation—the “why and how” of the developmental process. Second, explanations of a transactional and multidimensional nature of development are at the forefront of all chapters. Third, the multifaceted approach to development highlights contextual influences and cultural diversity among children from different communities and backgrounds. Finally, methodological innovation is a key concern, and research tools presented across chapters span the full array available to developmental scientists who focus on different systems and levels of analysis. The thoroughness and depth of this book, in addition to its methodological rigor, make it an ideal handbook for researchers, practitioners, policy makers, and advanced students across a range of disciplines, including psychology, education, economics and public policy.

Future Work in Clinical Child and Adolescent Psychology - Mitchell J. Prinstein 2018-10-18
Preeminent clinical child and adolescent psychological scientists offer an agenda for future research in this compendium of thought pieces. On a wide range of topics including ADHD, depression, self-injury, emotion regulation, conduct problems, addictions, clinical assessment and therapy, and many more, scientists review the current state of the literature and offer specific recommendations for what investigators next need to tackle to reduce mental illness among youth. Chapters include a discussion of theories and methods in clinical child and adolescent psychology, current funding priorities, and the intersection of traditional clinical psychology research with the
burgeoning field of psychological neuroscience. This book is an essential resource for classes on clinical child and adolescent psychopathology and treatment. It also provides a unique guide for undergraduate and early graduate students who are determining how to start their research careers in the field. All of the chapters in this book were originally published as articles in the Journal of Clinical Child and Adolescent Psychology.

Early Prevention of Adult Antisocial Behaviour - David P. Farrington 2003-04-17
This book presents a comprehensive summary of how well adult crime, antisocial behaviour and antisocial personality disorder can be prevented by interventions applied early in life. It reviews important childhood risk and protective factors for these adult outcomes and the alternative strategies of primary prevention (targeting the whole community) and secondary prevention (targeting persons identified as high risk) are discussed. The book also contains extensive information about prevention programmes in pregnancy and infancy, pre-school programmes, parent education and training programmes, and school programmes (including the prevention of bullying). There is special emphasis on preventing the intergenerational transmission of antisocial behaviour by focusing on family violence, and a special review of whether risk factors and prevention programmes have different effects for females compared to males. Cost-benefit analyses of early prevention programmes are also reviewed, leading to the conclusion that adult antisocial behaviour can be prevented both effectively and cost-efficiently.

Antisocial Behavior and Crime - Thomas Bliesener 2012
Leading experts review the latest findings and recommendations concerning the roots and prevention of antisocial behavior and crime. The developmental perspective is becoming increasingly significant in criminology and in research on antisocial and criminal behavior. Developmental criminology can explain the stability of antisocial behavior as well as how it emerges and disappears across the life span. This volume brings together many of the most renowned scientists in the field. They report the latest findings, explain various phenomena and trajectories of antisocial behavior, and present new research methods. In a series of reviews, they analyze the significance of biological, psychological, and social risk factors in the development of antisocial behavior and show how these findings can be applied not only in crime prevention, criminal justice, and offender treatment, but also in the risk management of young offenders.

Clinical Interviewing - John Sommers-Flanagan 2016-11-15
Fully updated guide to proven, practical strategies for conducting effective interviews - including access code to online videos. Clinical Interviewing is the essential guide to conducting initial interviews, suicide assessment, mental status examinations, and psychotherapy skill development. The Sixth Edition includes: Updates focusing on latest trends in clinical interviewing research and practice. Updated information on technology-based interviewing. Access to over 70 videos that show the authors discussing and demonstrating crucial interviewing techniques. Online instructor’s manual and resources to facilitate teaching. Fresh case examples to help apply interviewing skills and concepts. New coverage of special populations and multicultural considerations. Expanded skills coverage to help facilitate client insight and action. This new edition also includes a Registration Access Card with a unique one-time code to access the Wiley Interactive E-Text (Powered by VitalSource), enhanced with dynamic content, including instructional videos and practice questions to further enrich student learning. It provides uninterrupted, mobile access anywhere, anytime.

The Handbook of Forensic Psychology - Irving B. Weiner 2013-12-16
A revised new edition of one of the top references for forensic psychologists. This top professional and academic reference in forensic psychology is an established presence as both a professional reference and graduate text. This Fourth Edition is completely revised and updated for the new and rapidly growing demands of the field to reflect the new tools available to, and functions required of, present-day practitioners. The new edition expands coverage of neuropsychological assessment, eyewitness testimony, ad jury competence and decision-making, including selection, process and authority. In addition, the new ethics guidelines approved by the American Psychological Association (APA) are included and interpreted. Updated to include reframed content and the introduction of new chapter topics and authors. Ideal for professional forensic psychologists and graduate students. Written by experts in the field, a clinical professor of psychiatry and an associate professor of mental health policy.

Crime in Japan - Laura Bui 2019-04-03
This book reviews research on psychology and crime in Japan, and compares the findings with similar research conducted in Western industrialised countries. It examines explanations for crime and antisocial behaviour in Japan using research and theories from a psychological perspective. Topics covered include cultural explanations, developmental and life-course criminology, family violence and family risk factors, youth crime and early prevention, school factors and bullying, mental disorders, biosocial factors, psychopathy and sexual offending. In some parts, it challenges and refines the prevailing belief that Japan is a society characterised by low crime and
Delinquency and Substance Use in Europe

International textbook underpinned by considerations of human rights and ethical standards.

Psychology will also earn a place in the libraries of qualified forensic psychologist practitioners and courts of England and Wales. Perfect for graduate level students in forensic psychology courses, Forensic prisons and forensic mental health facilities. A treatment of psychology in the courts with an emphasis on the key legal issues and principles involved in risk assessments, the role of structured instruments and protocols, eyewitness testimony, and jury decision making. An examination of clinical and risk assessments, including reviews of the key legal issues and principles involved in risk assessments, the role of structured instruments and protocols, and coverage of actuarial and structured clinical methods. Discussions of working with criminalized populations in the civil and criminal justice systems in the United Kingdom. Each chapter concludes with some specific suggestions for further reading. Additionally, readers will enjoy the inclusion of a wide variety of topics, like: A thorough discussion of investigative and clinical practice, including the politics of forensic psychology, offender profiling, eyewitness testimony, and jury decision making. An examination of clinical and risk assessments, including reviews of the key legal issues and principles involved in risk assessments, the role of structured instruments and protocols, and coverage of actuarial and structured clinical methods. Discussions of working with criminalized populations in prisons and forensic mental health facilities. A treatment of psychology in the courts with an emphasis on the courts of England and Wales. Perfect for graduate level students in forensic psychology courses, Forensic Psychology will also earn a place in the libraries of qualified forensic psychologist practitioners and postgraduate students seeking to improve their understanding of forensic psychology with a high-quality international textbook underpinned by considerations of human rights and ethical standards.

Evidence-Based Policymaking - Karen Bogenschneider 2021-04-27

New thinking is needed on the age-old conundrum of how to connect research and policymaking. Why does a disconnect exist between the research community, which is producing thousands of studies relevant to public policy, and the policy community, which is making thousands of decisions that would benefit from research evidence? The second edition updates community dissonance theory and provides an even stronger, more substantiated story of why research is underutilized in policymaking, and what it will take to connect researchers and policymakers. This book offers a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. New to the second edition: A new theory holds promise for guiding the study and practice of evidence-based policy by building on how policymakers see research contributes to policymaking. A new chapter features pioneering researchers who have effectively influenced public policy by engaging policymakers in ways rewarding to both. A new chapter proposes how an engaged university could provide culturally competent training to create a new type of scholar and scholarship. This review of state-of-the-art research on evidence-based policy is a benefit to readers who find it hard to keep abreast of a field that spans the disciplines of business, economics, education, family sciences, health services, political science, psychology, public administration, social work, sociology, and so forth. For those who study evidence-based policy, the book provides the basics of producing policy relevant research by introducing researchers to policymakers and the policy process. Strategies are provided for identifying research questions that are relevant to the societal problems that confront and confound policymakers. Researchers will have at their fingertips a breadth-taking overview of classic and cutting-edge studies on the multi-disciplinary field of evidence-based policy. For instructors, the book is written in a language and style that students find engaging. A topic that many students find mundane becomes germane when they read stories of what policymakers are like, and when they learn of researcher’s tribulations and triumphs as they work to build evidence-based policy. To point students to the most important ideas, the key concepts are highlighted in text boxes. For those who desire to engage policymakers, a new chapter summarizes the breakthroughs of several researchers who have been successful at driving policy change. The book provides 12 innovative best practices drawn from the science and practice of engaging policymakers, including insights from some of the best and brightest researchers and science communicators. The book also takes on the daunting task of evaluating the effectiveness of efforts to engage policymakers around research. A theory of change identifies seven key elements that are fundamental to increasing policymaker’s use of research along with evaluation protocols and preliminary evidence on each element.

Forensic Psychology - David A. Crighton 2021-05-04

FORENSIC PSYCHOLOGY Explore the theory, research, and practice of forensic psychology with this collection of resources from recognized leaders in the field. The newly revised Third Edition of Forensic Psychology delivers insightful coverage of the theory and applications of forensic psychology. The book combines authoritative scholarship with an unprecedented breadth of international coverage and constitutes an essential resource for all aspects of contemporary forensic and criminal psychology. The new edition addresses issues of equality, diversity, and inclusion in each section, as well as the uses and abuses of power in forensic contexts. The book takes a constructively critical approach to the dominant theories, policy, and practices of today, as opposed to being merely descriptive, and considers new and developing areas, like the prevention of sexual violence at universities. Forensic Psychology comprehensively addresses the application of modern forensic techniques and practices to the civil and criminal justice systems in the United Kingdom. Each chapter concludes with some specific suggestions for further reading. Additionally, readers will enjoy the inclusion of a wide variety of topics, like: A thorough discussion of investigative and clinical practice, including the politics of forensic psychology, offender profiling, eyewitness testimony, and jury decision making. An examination of clinical and risk assessments, including reviews of the key legal issues and principles involved in risk assessments, the role of structured instruments and protocols, and coverage of actuarial and structured clinical methods. Discussions of working with criminalized populations in prisons and forensic mental health facilities. A treatment of psychology in the courts with an emphasis on the courts of England and Wales. Perfect for graduate level students in forensic psychology courses, Forensic Psychology will also earn a place in the libraries of qualified forensic psychologist practitioners and postgraduate students seeking to improve their understanding of forensic psychology with a high-quality international textbook underpinned by considerations of human rights and ethical standards.

Delinquency and Substance Use in Europe - David P. Farrington 2020-11-02
This book examines the use of “Communities That Care” (CTC) interventions in European countries. It reports results obtained by using the CTC Youth Survey in five European countries covering different parts of Europe – Great Britain, the Netherlands, Germany, Croatia, and Cyprus. The main aim of the book is to compare (a) the prevalence of delinquency and substance use, (b) the prevalence of key risk and protective factors, and (c) the strength of relationships between risk and protective factors and delinquency and substance use, in these five European countries. The chapters in this book compare similarities and differences between the countries, possible explanations of these, and the implications of the results for theories and for intervention policy and practice. Additionally, it provides evidence about the replicability over time and place of the strength of relationships between (i) risk and protective factors and (ii) delinquency and substance use. In turn, this increases confidence in the generalizability of criminological theories over time and place. It will be of interest to researchers and practitioners in criminology and criminal justice, particularly those with an interest in developmental and life-course criminology, juvenile delinquency, and substance use, as well as crime prevention and intervention. 

The definitive handbook on peer relations has now been significantly revised with 55% new material. Bringing together leading authorities, this volume presents cutting-edge research on the dynamics of peer interactions, their impact on multiple aspects of social development, and the causes and consequences of peer difficulties. From friendships and romance to social withdrawal, aggression, and victimization, all aspects of children’s and adolescents’ relationships are explored. The book examines how individual characteristics interact with family, group, and contextual factors across development to shape social behavior. The importance of peer relationships to emotional competence, psychological well-being, and achievement is analyzed, and peer-based interventions for those who are struggling are reviewed. Each chapter includes an introductory overview and addresses theoretical considerations, measures and methods, research findings and their implications, and future directions. New to This Edition *Chapters on neuroscience, social media, social inequality, prosocial behavior with peers, and sociological approaches. *Expanded coverage of applied issues: chapters on interventions for socially withdrawn children, activity programs that promote positive youth development, and policy initiatives. *Chapters on same- and other-sex peer relationships, peer influence, educational environments, evolutionary models, the self-concept, personality, and animal studies. *Increased attention to variations in peer relations due to culture, gender, and race. *Many new authors and topics reflect a decade’s worth of theoretical and methodological advances, including the growing use of complex longitudinal methods.

**Intergenerational Continuity of Criminal and Antisocial Behaviour** - Veroni I. Eichelsheim 2018-06-27

The relationship between a parent and a child is without any doubt one of the most influential and intimate relationships over the life course of an individual. Children resemble their parents in a variety of life outcomes such as socioeconomic status, family formation characteristics, and political views. There is growing evidence that some families – despite interventions by child protection services, judicial sanctions, and social mobility – are stuck in patterns of criminal behaviour, poverty, substance abuse, teenage parenthood, and other negative life events. This is a growing global problem for which currently no solution is available. This book brings together the most important and unique findings of intergenerational studies of criminal behaviour from around the world, and from a variety of disciplines, from criminology to sociology to anthropology. Each chapter explores the historical background of a specific study, its most important objectives, and the unique conclusions and implications that can be drawn from the data. Essential reading for all those interested in criminal behaviour, psychological criminology, and intergenerational psychology, this book provides an extensive overview of intergenerational studies on patterns of continuity and discontinuity of criminal, antisocial, or delinquent behaviour, as well as related behaviours or risk factors such as the intergenerational continuities in (harsh) parenting and family relationship quality.
