The speed with which Pompeii was enveloped by volcanic lava has left us an extraordinary and unique record of daily life in a Roman town. This information sticker book tells the story of that fateful day and its legacy, through photographs of mosaics, paintings and statues that were amazingly preserved and discovered in the ashes.

Teacher Education and Human Rights - Audrey Osler 2017-11-01

Teaching has been described as a hazardous profession and teacher educators are faced with a challenging task in preparing teachers for the future. Human rights are high on the international agenda but also have direct implications for teachers and students in the classroom. Originally published in 1996, this book brings together teacher education and human rights to examine how we might

best educate children and young people for citizenship. Drawing on case studies from the UK, Europe and internationally, the authors provide practical suggestions for ways in which teachers can increase young people's awareness of the importance of securing their rights and those of others in the community. Looking particularly at how teachers might challenge injustice, racism and xenophobia, they examine human rights as a basis for educational policies and discuss how international human rights instruments can be incorporated into the teacher education curriculum. The book will benefit teacher trainers, teachers and education policy makers concerned with race, gender and special needs: undergraduate and postgraduate student teachers and educational researchers.

KS3 Maths Green Practice Tests - Level 3-6 2007 - Richard Parsons 2009-01-01

KS3 Maths Green Practice Tests - Level 3-6

Big Picture Atlas - Emily Bone 2024-09-03

Young explorers can discover the countries, continents, oceans, mountains and ice caps of our amazing planet and learn where different animals and people live. There are fascinating facts about each country, plus flags and capital cities and an index of place names.

Yvain - Chretien de Troyes 1987-09-10

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Knives Over Queens - Wild Cards Trust 2019-08-13

Perfect for current fans and new readers alike, *Knives Over Queens* is an all-new adventure set in London, featuring a fresh cast of characters from the Wild Cards universe. Developed by aliens and field-tested on Earth, the virus known as Xenovirus Takis-A was released in New York in 1946, changing the course of human history forever. Most of those infected die – and a tiny percentage become deformed beings known as jokers. A lucky few survivors become aces: superhumans gifted with amazing powers. Now the virus has reached Britain. There, Prime Minister Sir Winston Churchill, gifted with extraordinary longevity, together with the Enigma ace Alan Turing, set up a special organization named the Order of the Silver Helix. They will need all of the wild cards they can find if they are to deal with the terrifying mutations spawned by the virus. Edited by #1 New York Times bestselling author George R. R. Martin and Melinda M. Snodgrass, *Knives Over Queens* features the writing talents of Paul Cornell, Marko Kloos, Mark Lawrence, Kevin Andrew Murphy, Emma Newman, Peter Newman, Peadar O Guilin, Melinda M. Snodgrass, Caroline Spector,

and Charles Stross. Now in development for TV: Rights to develop Wild Cards have been acquired by Universal Cable Productions, the team behind The Magicians and Mr. Robot, with the co-editor of Wild Cards, Melinda Snodgrass, as executive producer. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Key Stage 3 Mathematics - Richard Parsons 2004-03-01

KS3 Maths Topic-based Practice - Levels 3-6

Oh, Freedom! - Francesco D'Adamo 2016-06-09

This exciting adventure story follows a family of slaves in the USA in 1860 as they escape from a cotton plantation via the legendary Underground Railroad. An enthralling story of courage and resilience, centring on 10-year-old Tommy, it will fascinate children who might not know much about this secret escape route into Canada that was used by as many as 100,000 people. Ten-year-old Tommy roams the cotton fields of Alabama owned by the notorious Captain Archer. Intimidating guards with fierce dogs protect the land to prevent any slaves from leaving. That is until a supernatural spirit visits Tommy offering a way out. With his banjo slung over his shoulder, Peg Leg Joe guides Tommy, his family and other slaves out of Southern USA, and into Canada through the legendary Underground Railroads. Stretched for miles across the country's vastness, the network famously facilitated more than 100,000 slaves to a new life. For Tommy and his family, the escape is far from an easy ride. The young boy is forced to mature through this testing period and allow his strong will to guide himself and others to safety under the guidance of Peg Leg Joe. Set in the 19th century, D'Adamo's well-constructed novel tells a story distant in time, remains grounded in a reality that still exists today. Millions of people across the globe continue to be enslaved, including children.

Selected Writings of Alexandra Kollontai - Aleksandra Kollontai 1980

Alix Holt, in her careful, objective comments on the life and work of Miss Kollontai, has served her subject well. . . .She has given us this chance to become acquainted with the thought of a woman liberated before her time. New York Times Book Review"

The importance of teaching - Great Britain: Department for Education 2010-11-24
England's school system performs below its potential and can improve

significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

Rhythm to Recovery - Simon Faulkner 2016-10-21

Combining rhythmic music and movement with cognitive reflection and mindfulness, this comprehensive handbook shows how drumming and other rhythm-based exercises can have a powerful effect in individual, group and family settings. Incorporating the latest research on how rhythmic music impacts the brain, this book features over 100 different exercises spanning five key developmental areas: social and emotional learning; identity and culture; strengths and virtues; health and wellbeing; and families, teams and communities. It offers a safe entry to cognitive reflection through fun, experiential rhythmic exercises and is useful for working in settings such as school, child and adolescent counselling settings, mental health and drug and alcohol interventions, trauma counselling and relational counselling. Important sections on the use of metaphor and analogy show how to reinforce experiential outcomes. The book also contains helpful sections on working with specific populations, key facilitation skills and managing challenging behaviours. Downloadable resources such as evaluation forms, certificates and 52 session cards optimise the process of implementing this approach in practice.

Teaching Peter McLaren - Marc Pruyn 2005

Teaching Peter McLaren, the first volume in the Teaching Contemporary Scholars series, focuses on the work of educational scholars on the left who have made major contributions to the field. In this book, editors Marc Pruyn and Luis M. Huerta-Charles have assembled a notable group of contributors who reflect on, analyze, and critique over two decades' worth of scholarship produced by Peter McLaren, one of the most influential and widely read leftist scholars working in academia today. Specifically, this book focuses on the nexus of education, critical theory, Marxism, globalization, and struggles for social justice via the work and theorizing of McLaren.

Romanticism Against the Tide of Modernity - Michael Löwy 2002-01-01

Romanticism is a worldview that finds expression over a whole range of cultural fields—not only in literature and art but in philosophy, theology, political theory, and social movements. In *Romanticism Against the Tide of Modernity* Michael Löwy and Robert Sayre formulate a theory that defines romanticism as a cultural protest against modern bourgeois industrial civilization and work to reveal the unity that underlies the extraordinary diversity of romanticism from the eighteenth to the twenty-first century. After critiquing previous conceptions of romanticism and discussing its first European manifestations, Löwy and Sayre propose a typology of the sociopolitical positions held by romantic writers—from “restitutionist” to various revolutionary/utopian forms. In subsequent chapters, they give extended treatment to writers as diverse as Coleridge and Ruskin, Charles Peguy, Ernst Bloch and Christa Wolf. Among other topics, they discuss the complex relationship between Marxism and romanticism before closing with a reflection on more contemporary manifestations of romanticism (for example, surrealism, the events of May 1968, and the ecological movement) as well as its future. Students and scholars of literature, humanities, social sciences, and cultural studies will be interested in this elegant and thoroughly original book.

The Game of Light - Hervé Tullet 2011-03-30

Young readers can cast different shapes on a wall using a flashlight and this book with cut-outs on each page. On board pages.

Defining Autism - Emily L. Casanova 2018-10-18

Offering a summary of the current state of knowledge in autism research, *Defining Autism* looks at the different genetic, neurological and environmental causes of, and contributory factors to autism. It takes a wide-ranging view of developmental and genetic factors, and considers autism's relationship with other conditions such as epilepsy. Shedding light on the vast number of autism-related syndromes which are all too often denied adequate attention, it shows how, whilst autism refers to a single syndrome, it can be understood as many different conditions, with the common factors being biological, rather than behavioral.

Key Stage 3 Chemistry. Levels 5-7 - Richard Parsons 2004-08-01

Suitable for home practice, this multipack contains both practice exam questions and answers.

Ks3 Physics Essential Sats Practice and Answers - Richard Parsons 2004-08-01

Suitable for home practice, this multipack contains both practice exam questions and answers.
