This book also delivers practical advice for achieving the best results with a younger population by utilizing interventions that address the needs of their clients. With this guide, you will be able to determine which approaches are acceptable to the children and families in your practice, and ensure the therapy is meaningful to their daily lives.

Frames of Reference for Pediatric Occupational Therapy - Paula Kramer 2018-12-07

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. **Frames of Reference for Pediatric Occupational Therapy, Fourth Edition**, uses frames of reference for diagnostic categories (neuro-development, social participation, etc.) as effective blueprints for applying theory to pediatric OT practice. Updated with new chapters, case examples, and a new focus on evidence-based practice. This proven approach helps students understand the “why” of each frame of reference

before moving on to the “how” of creating effective treatment programs to help pediatric clients lead richer, fuller lives. The book first covers the foundations of frames reference for pediatric OT (Section I), and then covers commonly used frames of reference such as motor skill acquisition, biomechanical, and sensory integration (Section II). A final section discusses newer focused/specific frames of reference like handwriting skills and social participation. A standardized format within each frame of reference chapter covers the same elements (Theoretical Base, Supporting Evidence, the Function/Dysfunction Continuum, Guide to Evaluation, and Application to Practice) to help students build the knowledge and skills needed for effective practice.

Occupational Therapy Evaluation for Children : a Pocket Guide - Shelley Mulligan 2014

"In pediatrics, occupational therapy practitioners are concerned most with positively impacting the extent to which children and their families are able to successfully and meaningfully go about their daily lives, whether it be playing, learning, working, caring for oneself or others, or socializing. Clinical decisions made throughout the evaluation process ultimately shape what and how occupational therapy practitioners deliver interventions, perhaps making the evaluation process the most important and interesting part of the service delivery process. It is the context where we first come to know and appreciate our clients, their specific situations, and discover what it is that we, as occupational therapy practitioners can do to be of most help"--Provided by publisher.

Occupational Therapy Models for Intervention with Children and Families

- Sandra Dunbar 2024-06-01

Occupational Therapy Models for Intervention with Children and Families explores recent theoretical models that enable occupational therapists to practice and interact with families in a more holistic and occupation-centered manner. This comprehensive and dynamic text offers the latest information on viewing the broader contexts of environment and family in order to meet diverse occupational needs in a range of settings. Sandra Barker Dunbar presents a variety of case scenarios that feature culturally diverse populations and varying diagnoses of children with occupational needs. With contributions from 11 renowned leaders in occupational therapy, this comprehensive text is designed to increase awareness and understanding of theoretical models and their relationship to current occupational therapy practice with today's children and families. Inside Occupational Therapy Models for Intervention with Children and Families, traditional frames of reference in pediatric practice are explored, including sensory integration and neurodevelopmental treatment. Some current theoretical models discussed include the Model of Human Occupation, the Person-Environment-Occupation model, the Ecology of Human Performance model, and the Occupational Adaptation model. The new Occupational Therapy Practice Framework is incorporated throughout the text. Employing a practical approach to this significant aspect of pediatric practice in occupational therapy, Occupational Therapy Models for Intervention with Children and Families is an invaluable tool for students at all curriculum levels.
